

CERTIFICATION COURSES I

Truck T1-T5

Mtk Skolen AS is a course- and training center. The activities are based on a combination of theoretical knowledge and practical exercises. The course center offers courses, exercises, and other activities that are related to security and safety for your company's employees and managers. We offer courses in a realistic and safe environment with professional instructors.

MÅLGRUPPE

Anyone operating forklifts should have forklift training, including temporary staff, maintenance personnel and supervisors.

GOAL

Mtk skolen want to create safety through realistic and qualitatively training for those who are operating forklifts, to reduce the risk of adverse events.

DURATION

3 day: 0900-1630
or by appointment.

Courses for your company

Mtk skolen AS also offer an internal course for certification. This includes simplified practical exercises. Please contact us for offers

COURSE CONTENT

The course is a combination of theory, practical exercises and demonstrations and with a final exam. The course includes:

- Truck types and optional equipment
- Laws and regulations
- Control and maintenance
- Stability
- Goods handling
- Traffic and safety regulations
- Work environment
- Hazardous goods

Simulator training.

We are up to date!

Machines develop in record time today. With a simulator, we can stay updated with modern machines and the latest in technology and safety equipment. This will give the student a very good start on the training before heading out to master our machines.
